装帧:Hardcover

isbn:9781552977811

Dramatic images never before published in a single volume.

High above the dirty window of Earth's atmosphere, the Hubble Space Telescope (HST) enjoys a clear view of the universe. Hubble uses hundreds of the latest, most spectacular images from the HST to illustrate a comprehensive astronomy reference. Stargazers will be astonished to see in color pictures what were once fuzzy photographs, dots on a star map or words in a textbook.

Hubble explains how new discoveries are revising scientific understanding of the Universe. Detailed images of the Eagle Nebula show several fingers rising above a massive gas cloud. At the end of each fingertip -- the width of our solar system -- is the birth of a star.

The book covers the observable universe in six sections:

- Stars in the Firmament
- Stellar Death and Destruction
- Gregarious Galaxies
- The Expansive Universe
- Solar Systems
- The Heavenly Wanderers

Clear and concise text explains the fascinating history of astronomy and the development of the HST. Hubble transports readers to the planets of our solar system and on to galaxies millions -- even billions -- of light years away. These dramatic, unforgettable images will bring into sharp focus how the Universe is unfolding in new and astonishing ways.

作者介绍:

罗宾·克洛德
，著名天文学家，英国皇家天文学会和英国星际学会会员，同时也是一位知名作家，著有《The Sky at Night》、《The Illustrated History of NASA》等。

卡罗尔·斯托特，著名天文学家，英国格林尼治皇家天文台台长，天文学及空间科学知名作家，著有30多部著作，并为英国多家天文杂志的专栏作家。
