著者:Hitchcock, Christopher 编

出版者:Wiley-Blackwell

出版时间:2004-01-16

装帧:Paperback

isbn:9781405101523

Contemporary Debates in Philosophy of Science features original essays on some of the most hotly debated issues in the field. Are there laws of social science? Are causes physically connected to their effects? Is the mind a system of modules shaped by natural selection? Eight central questions shape the volume, with each question treated by a pair of opposing essays. This distinctive format offers readers a unique opportunity to observe philosophers engaging in head-to-head debate. Together, the essays provide an accessible introduction to the major topics in contemporary philosophy of science, including empiricism, confirmation, realism, laws, causation, and explanation. Showcasing original arguments for well-defined positions, as well as clear and concise statements of sophisticated philosophical views, this volume is an excellent resource for professional philosophers and students alike.

太失望了。这个想法特别好，但是选题很烂。二十多个作者只有一个女的不说，很多章节写的超差，感觉宁可要烂哲学也坚决不能要女哲学家。对Hitchcock太失望了
