isbn:9780130972354

For courses in Lighting Design, Architectural Design, Interior Design, Electrical and

Mechanical Systems Design, or Environmental Control Systems in departments of architecture and construction. Using a concise and logical format that explains fundamentals in very simple terms-yet extensively-this text helps students develop a working knowledge of the design decisions, equipment options, and operations of different building sub-systems. Readers will learn to design, size, and detail the different sub-systems installations, select fixtures and components, and integrate all the building sub-systems with site, building, foundations, structure, materials, and finishes.
