著者:Laine, Richard (EDT)/ Hu, Michael (EDT)/ Lu, Song Wei (EDT)

出版者:John Wiley & Sons Inc

出版时间:2006-3

装帧:Pap

isbn:9781574982428

Since the beginning of the nanotechnology era, research and development in this field has experienced an explosive growth in academia and industry. Topics covered in this book include synthesis and characterization of nanomaterials, nanoscale phenomena in electronic ceramics, nanostructured bioceramics, industrial development and application, and much more.
