This book is a joint package of a practical manual on how to undertake meta-analysis in medicine together with an accompanying CD-ROM. This provides individuals with

access to meta-analysis software and the instructions and guidance on how to undertake them. The software package contains a computer program 'Metanalysis' which performs statistical analyses for the meta-analysis. It has some unique features currently not available in other meta-analysis software packages: \* ability to import graphics into Word, PowerPoint etc \* Galbraith's plots \* cumulative meta-analysis \* number needed to treat \* publication bias assessment The graphics generated by the software are in a format compatible with Microsoft PowerPoint.
