出版者:Springer Verlag

出版时间:2004-12

装帧:Pap

isbn:9788886208284

It is well known that heterocyclic derivatives represent almost half of the several million chemical species discovered to date. The importance of these compounds in many branches of chemistry ensures further investigation and attention. This series aims to stimulate creativity and innovation by including research by leading authorities. As well as highlights of interesting developments in specific areas, there are also comprehensive reviews reporting the overall state-of-the-art. Targets in Heterocyclic Systems Volume 7 will be welcomed by researchers and industrialists with an interest in the synthesis, reactivity and medicinal properties of heterorings.
