"By far the most helpful, entertaining, up-to-date and accessible treatment of the energy-economy-environment problematique available." --John P. Holdren, Scientific American

A fiercely independent and irresistibly entertaining look at the economic, political and technological forces that are reshaping the world's management of energy resources, *Power to the People* has been hailed as "as good a manifesto for the new energy world as you will find." (Fred Pearce, *New Scientist*). The *Economist's* Environment and Energy correspondent, Vijay V. Vaitheeswaran sees great opportunity in the energy realm today, and he documents an energy revolution already under way.

From the corporate boardroom of a Texas oil titan who denies the reality of global warming, to a think tank nestled in the Rocky Mountains where a visionary named Amory Lovins is developing hydrogen fuel-cell technology that could make the internal combustion engine obsolete, Vaitheeswaran gamely pursues the people who hold the keys to our future. Avoiding the traditional divide that pits free markets against the wisdom of conservation and the need for clean energy, *Power to the People* debunks myths without debunking hope.

作者介绍:

Vijay V. Vaitheeswaran is *The Economist's* Environment and Energy Correspondent, covering developments in politics, economics, business, and technology as they relate to energy issues. He has received awards for his journalism, and previously wrote about Latin America as the magazine's regional bureau chief in Mexico City. Born in Madras, India, he grew up in Cheshire, Connecticut and graduated from MIT with a degree in mechanical engineering. He now lives in New York.
