著者:Bishop, Owen

出版者:Butterworth-Heinemann

出版时间:2007-9

装帧:Pap

isbn:9780750665568

Owen Bishop introduces, through hands-on project work, the mechanics, electronics and programming involved in practical robot design-and-build. The use of the PIC microcontroller throughout provides a painless introduction to programming whilst

harnessing the power of a highly popular microcontroller used by students and design engineers worldwide. This is a book for first-time robot builders, advanced builders wanting to know more about programming robots and students in Further and Higher Education tackling microcontroller-based practical work. They will all find this book a unique and exciting source of projects, ideas and techniques, to be combined into a wide range of fascinating robots. This book: contains full step-by-step instructions for 5 complete self-build robots; introduces key techniques in electronics, programming and construction - for robust robots that work first time; contains illustrations, close-up photographs and a lively, readable text that make this a fun and informative guide for novice and experienced robot builders.
