著者:Smith, Jeffrey M.

出版者:Chelsea Green Pub Co

出版时间:2007-4

装帧:HRD

isbn:9780972966528

In this powerful sequel to "Seeds of Deception", Jeffrey Smith shatters the biotech industry's claim that genetically modified (GM) foods are safe. Nearly forty health risks of the foods that Americans eat every day are presented in easy-to-read two-page

spreads. The left page is designed for the quick scanning reader; it includes bullets, illustrations, and quotes. The right side offers fully referenced text, describing both research studies and theoretical risks. It is presented in the clear, accessible style that made Jeffrey Smith's "Seeds of Deception" the world's best-selling book on genetically engineered foods. The second half of "Genetic Roulette" explores why children are most at risk, how to avoid GM foods, false claims by biotech advocates, how industry research is rigged to avoid finding problems, why GM crops are not needed to feed the world, the economic losses associated with these crops, and more. This book, prepared in collaboration with a team of international scientists, is for anyone wanting to understand GM technology, to learn how to protect themselves, or to share their concerns with others.
