著者:Midgley, Gerald 编

出版者:Sage Pubns

出版时间:2003-2

装帧:HRD

isbn:9780761949596

Systems Thinking brings together classic and contemporary writings that cross the

entire breadth of the systems field. The four-volume set includes the most influential theoretical papers, as well as applications in domains as diverse as global environmental modelling, business strategy, public sector planning, family therapy and the management of organizations. Key critiques of the leading writers allow the researcher to understand how and why paradigm breaks took place, and to grasp the extraordinary diversification of systems theory and practice we see today. Systems Thinking will be an essential reference for all libraries of business, management and organization studies.
