isbn:9780618590773

Revised with the assistance of new author Christopher Hadad, Ohio State University the Study Guide and Solutions Manual offers solutions to both in-text and end-of-chapter problems with an explanation of the answers. For each chapter, the guide provides a chapter summary, learning objectives, and a summary of synthetic methods and reaction mechanisms. Review problems on synthesis and 100 multiple-choice sample test questions offer students additional problem-solving practice.
