Product Description

This book is an introduction to the quantitative treatment of chemical reaction engineering. It is appropriate for a one-semester undergraduate (or first-year grad) course. The text provides a balanced approach in two regards: first, it covers both homogeneous and heterogeneous reacting systems, and second, it covers both chemical reaction engineering and chemical reactor engineering.

About the Author

B.S. ChE, Virginia Polytechnic Institute (1985) * M.S. ChE, Stanford University (1987) * Ph.D. ChE, Stanford University (1989) Honors and Awards * NSF Young Investigator Award * DuPont Young Professor Award * Union Carbide Innovation Recognition Award
