著者:Mendeleev, Dmitri Ivanovich/ Jensen, William B. (EDT)

出版者:Dover Publications

出版时间:2005

装帧:paperback

isbn:9780486445717

This is the first English-language collection of Mendeleev's most important writings on the periodic law. Thirteen papers and essays reflect the era corresponding to the initial establishment of the periodic law, the priority disputes and experimental confirmations, and the ultimate acceptance for the law and increasing international recognition for Mendeleev.
