isbn:9780754815808

This book contains a lively history of armoured fighting vehicles from the beginning of

the 20th century through to the present generation of lighter, faster and more agile AFVs. From the days before radio communication through to the World Wars, the Cold War and the birth of the Infantry Fighting Vehicle, the author highlights the varied roles AFVs have played, as well as how these adaptable vehicles have evolved and developed over time. The book includes two substantial and comprehensive A-Z sections forming an illustrated guide to over 170 AFVs. The first of these covers the period from 1900-45 when the major types were evolving. The second A-Z section focuses on the remarkable advances in AFV development post-World War II. This wonderfully illustrated book provides enthusiasts and historians with key information on these diverse and often underrated vehicles.
