Invitation to Fixed-Parameter Algorithms

Invitation to Fixed-Parameter Algorithms_下载链接1_

著者:Niedermeier, Rolf

出版者:Oxford Univ Pr

出版时间:2006-2

装帧:HRD

isbn:9780198566076

This research-level text is an application-oriented introduction to the growing and highly topical area of the development and analysis of efficient fixed-parameter algorithms for optimally solving computationally hard combinatorial problems. The book is divided into three parts: a broad introduction that provides the general

philosophy and motivation; followed by coverage of algorithmic methods developed over the years in fixed-parameter algorithmics forming the core of the book; and a discussion of the essentials from parameterized hardness theory with a focus on W[1]-hardness which parallels NP-hardness, then stating some relations to polynomial-time approximation algorithms, and finishing up with a list of selected case studies to show the wide range of applicability of the presented methodology. Aimed at graduate and research mathematicians, programmers, algorithm designers, and computer scientists, the book introduces the basic techniques and results and provides a fresh view on this highly innovative field of algorithmic research.

沒辦法更爛的一本書。任何算法他竟然都能找到最差的方法去詮釋。充斥著exhaustive cases enumeration,完全沒有一絲絲一點點數學的美。

monograph 不是教材 略有堆砌结果感。
