isbn:9780879698027

This is the story of the sequencing of the fly genome as told by one of the participants, Michael Ashburner. Written in a diary-like form, half the story is told in numerous footnotes. Ashburner has written a delightful, candid, irreverent, on-the-scene tale filled with eccentric personalities all focused on a single goal. The book also contains an Epilogue that puts *Drosophila* as a model system in historical context, and an Afterword that discusses the impact the genome sequence has had on the study of *Drosophila*. Also included are portraits by Lewis Miller of some of the principal characters. About the author: Michael Ashburner is Professor of Biology in the Department of Genetics at the University of Cambridge. By training and inclination, he is a *Drosophila* geneticist, although for more than a decade, he has not been where he belongs - the lab bench - but in front of computer screens. He spent six years at the European Bioinformatics Institute, first as the Institute's Research Programme Coordinator, and then as its Joint-Head. He is a Fellow of the Royal Society and an Honorary Foreign Member of the American Academy of Arts and Sciences.
