著者:Davis, Allen P./ McCuen, Richard H.

出版者:Springer Verlag

出版时间:2005-8

装帧:HRD

isbn:9780387260488

Current trends in stormwater management add pollution control to existing priorities of flood protection and peakflow limits. From a fundamental overview of supporting information on water quality, statistics and hydrology to detailed sections devoted to treatment and management practices, this book examines the latest treatment practices and techniques for improving stormwater quality to protect against stream, river and estuary degradation.
