isbn:9780387493732

During the past twenty years *Listeria monocytogenes* has emerged as one of the most intensely studied bacterial pathogens. New windows are constantly being opened into the complexity of host cell biology and the interplay of the signals connecting the various cells and organs involved in the host response. This volume includes research from studies at the molecular level on the pathogenesis of *Listeria monocytogenes* and the response of the host to its infections.
