著者:Fienberg, Stephen E.

出版者:Springer Verlag

出版时间:2007-7

装帧:Pap

isbn:9780387728247

A variety of biological and social science data come in the form of cross-classified tables of counts, commonly referred to as contingency tables. Until recent years the statistical and computational techniques available for the analysis of cross-classified data were quite limited. This book presents some of the recent work on the statistical analysis of cross-classified data using longlinear models, especially in the multidimensional situation.
