出版时间:1991-7-1

装帧:Paperback

isbn:9780262660723

Most general histories of technology are Eurocentrist, focusing on a main line of Western technology that stretches from the Greeks is through the computer. In this very different book, Arnold Pacey takes a global view, placing the development of technology squarely in a "world civilization." He portrays the process as a complex dialectic by which inventions borrowed from one culture are adopted to suit another.Arnold Pacey is a physicist turned historian whose publications have contributed to the British appropriate-technology movement. He has written widely on science, technology, and agriculture. His previous books include The Maze of Ingenuity and The Culture of Technology.
