出版时间:2004-6

装帧:HRD

isbn:9780444517203

"Mesoporous Crystals and Related Nano-Structures Materials" contains the invited lectures to be presented at the symposium on Mesoporous Crystals and Related Nano-Structures Materials, Stockholm, Sweden, June 1-2, 2004. This book highlights the core research that has led to such a fruitful and exciting field. Passing on, first hand, the synthesis of this novel material makes this book an important reference material to researchers young and old. This book highlights the core research that has led to the fruitful and exciting field of mesoporous materials. It provides an overview of the studies which have led to the discovery of mesoporous materials as well as first preparations of mesoporous materials by researchers across the world. This book not only serves as important reference material but also as a source of scientific inspiration to all researchers working in the field of mesoporous materials.
