For courses in Fabrication for electronics majors; also appropriate for special senior

project courses. With its hands-on approach and careful focus on key topics, this innovative text presents thorough coverage of the fundamentals of electronic design, fabrication, and documentation, PLUS a complete experience in creating electronic prototype devices. Students work their way through Sample, Exercise, and Elective Projects (covering all skill levels) and develop a thorough Project Report-with written and graphic documentation-delineating procedures, developments, and specifications of a project.
