isbn:9780444518545

Many aspects of basic research programmes are intimately related to natural products. With articles written by leading authorities in their respective fields of research, "Studies in Natural Products Chemistry, Volume 30" presents current frontiers and future guidelines for research based on important discoveries made in the field of bioactive natural products. It is a valuable source for researchers and engineers working in natural product, and medicinal chemistry. It describes the chemistry of bioactive natural products and contains contributions by leading authorities in the

field.
