This new text offers an Excel-focused approach to using statistics in business. All statistical concepts are illustrated with applied examples immediately upon introduction. Modern computing tools and applications are introduced, and the text maintains a strong focus on presenting statistical concepts as applied using Excel, enhanced by MegaStat, the Excel add-in created by the author and used as a standard for all McGraw-Hill/Irwin Business Statistics textbooks. The text enables students to take full advantage of Excel to develop and drive problem-solving skills. As a one-color paperback, it is also a competitive low-cost alternative to most of the higher-priced books in the market.
