"Theatre and Performance in Digital Culture" examines the recent history of advanced technologies, including new media, virtual environments, weapons systems and

medical innovation, and considers how theatre, performance and culture at large have evolved within those systems. The book examines the two Iraq wars, 9/11 and the War on Terror through the lens of performance studies, and, drawing on the writings of Giorgio Agamben, Alain Badiou and Martin Heidegger, alongside the dramas of Beckett, Genet and Shakespeare, and the theatre of the Kantor, Foreman, Societas Raffaello Sanzio and the Wooster Group, the book positions theatre and performance in technoculture and articulates the processes of aesthetics, metaphysics and politics. This wide-ranging study reflects on how the theatre and performance have been challenged and extended within these new cultural phenomena.
