

Location-based Management for Construction

[Location-based Management for Construction_ 下载链接1](#)

著者:Kenley, Russell/ Seppanen, Olli

出版者:Routledge

出版时间:2009-7

装帧:HRD

isbn:9780415370509

With extensive case studies for illustration, this is a practitioner's guide to an entirely new production system for construction management using flowline scheduling. Covering the entire process of presenting a comprehensive management system - from design, through measurement, scheduling, and visualization and control - its emphasis is on reducing cost and increasing quality. Drawing its components together into a management system, the authors not only include theory and explanations of how and why it works, but also examine and present a suite of methods for successful project implementation. Perfect as a how-to guide for researchers and advanced construction students to discover the simple application of the new techniques, and invaluable for acquiring the practical tools for planning and controlling projects.
