出版时间:2003-9

装帧:Pap

isbn:9780131008458

For undergraduate level physical chemistry courses. The textbook was written as a supplement to help students learn and apply the advanced mathematics necessary to understand physical chemistry. The first half of the book should act as a review of subject matter normally covered in prerequisite courses. The latter half of the book covers important material normally not covered in prerequisite mathematics courses, but is essential to physical chemistry study.
