This book covers selected papers that were presented by participants at a 'Wetland

Invitational' held in Columbus Ohio, USA in May 2003. They are divided, by subject matter into four general categories: Restoration of a large river basin and delta; Long-term wetland restoration; Creation of wetlands for mitigation of wetland loss; Conservation and restoration of the world's wetlands. This book provides key integrated, long-term assessments. It covers a selection of the world's most significant wetlands. It addresses management approaches for wetland conservation, creation and restoration.
