Seven years before Richard Preston wrote about horrifying viruses in *The Hot Zone*, he turned his attention to the cosmos. In *First Light*, he demonstrates his gift for creating an exciting and absorbing narrative around a complex scientific subject--in this case the efforts by astronomers at the Palomar Observatory in the San Gabriel Mountains of California to peer to the farthest edges of space through the Hale Telescope, attempting to solve the riddle of the creation of the universe.

Richard Preston's name became a household word with *The Hot Zone*, which sold nearly 800,000 copies in hardcover, was on *The New York Times*'s bestseller list for 42 weeks, and was the subject of countless magazine and newspaper articles. Preston has become a sought-after commentator on popular science subjects.

For this hardcover reprint of what has been called "the best popular account of astronomy in action," (Kirkus Reviews) he has revised the text and written a new introduction.--From the Hardcover edition.

最动人的是 Maarten Schmidt
与妻子在沙漠里并肩而坐，安静地交换着望远镜，观看着黑夜里的星空~Maarten绝对有怪咖气质，喜欢观测时绕着圆顶边上的“栈桥（姑且称之）”踱步，喜欢听巴赫！！！！
