Instant Notes is an ongoing series of review volumes jointly published by Springer-Verlag and BIOS Scientific Publishers. Instant Notes provides a structured approach to learning by covering all the important topics in a uniform, systematic format. Each topic begins with a summary of the essential facts, followed by detailed explanations and clear, simple illustrations. The diagrams are easy to learn and understand. Instant Notes is ideal for anyone looking for a compact, effective alternative to massive works and accompanying information overload. Instant Notes in Inorganic Chemistry provides excellent coverage of inorganic chemistry for the student or professional. The early parts of the book cover background materials including atomic structure, bonding in molecules and solids, and general principles of reactivity. The later parts cover the descriptive chemistry of different areas of the periodic table. Environmental, biological, and industrial areas are also included. This book provides a structured approach to learning by covering all the important topics in a uniform, systematic format.
