著者:Lueder, Ernst

出版者:John Wiley & Sons Inc

出版时间:2001-7

装帧:HRD

isbn:9780471490296

The broad scope of this text includes direct view displays, methods of both saving energy and enhancing the performance of displays. It presents the latest results in the LCD field with new applications from miniature headset displays to digital cinema and highlights methods for designing improved Thin Film Transistors (TFTs) and Metal-Insulator-Metal (MIM) devices. The text focuses on the practicalities of liquid crystal behaviour and device construction, explaining how to save energy and enhance display performance.
