

Grand Canyon Geology

[Grand Canyon Geology_ 下载链接1](#)

著者:Beus, Stanley S. (EDT)/ Morales, Michael (EDT)

出版者:Oxford Univ Pr

出版时间:2002-11

装帧:Pap

isbn:9780195122992

Two new chapters will be added to the Second Edition of this successful text, one on debris flow in the Canyon and the other on impact of water flow releases from the Glen Canyon Dam. The rest of the chapters will be updated where necessary and photographs will be replaced or re-screened for better resolution.
