isbn:9780444530677

This 5th edition of the "Zeolite Powder Pattern Collection" contains calculated patterns of 218 zeolite materials representing 174 framework topologies. The almost exponential growth of new zeolite topologies reflects the continued success of zeolite synthesis researchers in producing novel materials. "Collection of Simulated XRD Powder Patterns for Zeolites" includes materials of interest to zeolite scientists following the policies established at recent IZA conferences. The materials included have corner-sharing tetrahedral frameworks with no restrictions on chemical composition. It covers an increase of 41 new topologies since the 4th edition in 2001 based on data collected from diverse literature sources. It represents an extensive compilation of data.
