isbn:9780756631208

Combining a concise practical guide to astronomy with card decks, sky maps, and a flashlight, Starfinder explains how to navigate around the night sky, shows you what you can expect to see, and provides all the tools you need to see the constellations for yourself. It also includes a section on observing the Moon, planets, and other bodies of the Solar System, as well as a monthly guide to the skies in both the northern and southern hemispheres.
