isbn:9780763744304

Meant to be used with The Electrical Safety Program Book, this guide provides step-by-step advice in building your own facility electrical safety program manual,

maintaining a safe workplace and demonstrating to management, inspectors, and OSHA compliance officers how you are doing it. This resource provides blank forms to copy and fill in and example forms suggesting possible entries for you to consider when preparing a manual that fits your unique needs. Together with the Program Book, this provides the guidance needed by facility and plant managers, safety engineers, and supervisory plant electricians to develop the program, document it, and train to it.
