Spatial information users and providers are increasingly concerned about the legal implications relating to the use and dissemination of geographic information for which there are no right or wrong methods of practice, and no one source of information. This book fills the gap by addressing key issues in contract law, intellectual property law, rights and responsibilities and liability as they relate to the GI community. The first book to interpret the law relating to GI Science and outline its implications to a general readership Provides a comprehensive discourse in law and GI Science irrespective of jurisdiction Offers a global perspective throughout with case materials coming from the UK, North America, the EU and Australasia
