出版者:Oxford Univ Pr

出版时间:1998-1

装帧:Pap

isbn:9780841232488

This collection looks at science as filtered through literature, film and television. It discusses classic works in science fiction and provides an in-depth look at the chemistry depicted in popular culture, particularly in "Star Trek", "Star Wars", and "Doctor Who". It includes an examination by Nebula Award winner Connie Willis of how science fiction authors use science, and reprints two tongue-in-cheek short stories by Isaac Asimov. The book also includes suggestions for using science fiction as an educational resource.
