isbn:9780130452696

For vocational/technical, proprietary, or college courses in Mathematics for the Technical Trades. Mathematics for the Technical Trades is a complete "prep math" text for students in electrical, electronics, construction, automotive, machining, welding, drafting, plumbing, printing and many other technical career programs. Assuming no prior understanding, this easy-to-understand text begins with fractions and decimal numbers and proceeds to build a solid foundation in exponents, the metric system, algebra, geometry and trigonometry.
