著者:Jaeger, Richard C.

出版者:Prentice Hall

出版时间:2001-10

装帧:Pap

isbn:9780201444940

For courses in Theory and Fabrication of Integrated Circuits. The author's goal in writing this text was to present a concise survey of the most up-to-date techniques in the field. It is devoted exclusively to processing, and is highlighted by careful explanations, clear, simple language, and numerous fully-solved example problems. This work assumes a minimal knowledge of integrated circuits and of terminal behavior of electronic components such as resistors, diodes, and MOS and bipolar transistors.
