

# Tunable Lasers Handbook

[Tunable Lasers Handbook 下载链接1](#)

著者:Duarte, F. J. 编

出版者:Lightning Source Inc

出版时间:1995-12

装帧:HRD

isbn:9780122226953

Many laser applications depend on the ability of a particular laser to be frequency tunable. Among the many different types of frequency tunable lasers are: dye lasers, excimer lasers, and semiconductor lasers. This book gives active researchers and engineers the practical information they need to choose an appropriate tunable laser for their particular applications. It presents a unified and integrated perspective on tunable lasers. It includes sources spanning the electromagnetic spectrum from the UV to the FIR. It contains 182 figures and 68 tables; and provides coverage of optical parametric oscillators and tunable gas, liquid, solid state, and semiconductor lasers.
