"Nietzsche, Epistemology, and Philosophy of Science" is the second volume of a collection on Nietzsche and the Sciences, featuring essays addressing truth, epistemology, and the philosophy of science, with a substantial representation of analytically schooled Nietzsche scholars. This collection offers a dynamic articulation of the differing strengths of Anglo-American analytic and contemporary European approaches to philosophy, with translations from European specialists, notably Carl

Friedrich von Weizsacker, Paul Valadier, and Walther Ch. Zimmerli. This broad collection also features a preface by Alasdair MacIntyre. Contributions explore Nietzsche's contributions to the philosophy of language and epistemology, and include essays on the social history of truth and the historical and cultural analyses of Serres and Baudrillard, as well as new contributions to the philosophy of science, including theological and hermeneutical approaches, history of science, the philosophy of medicine, cognitive science, and technology.
