The Science Times Book of Fossils and Evolution traces life's first foothold on earth

and the explosion of creation in the Cambrian era, through the reigning years of the largest animals to ever walk the planet - the dinosaurs of the Mesozoic - to the emergence of Homo sapiens two hundred thousand years ago. This illustrated volume reports on extraordinary fossil finds and currently vying theories of evolution. Included are the most pivotal discoveries of paleontology: the unearthing of Australopithecus in Ethiopia, the treasure trove of fossils in the Gobi Desert, and the startling discovery that Neanderthals lived in Europe only thirty thousand years ago. The Science Times Book of Fossils and Evolution will be enjoyed by amateur archaeologists, naturalists, students, dinosaur enthusiasts, and everyone interested in science.

作者介绍:

主编尼古拉斯·魏德

尼古拉斯·魏德是《纽约时报》的撰稿人。他早年曾作过《自然》杂志驻华盛顿的通讯员和代理编辑，1990至1996年间，他担任过《纽约时报》“科学时代”栏目的编辑。他发表的主要著作有：《最后的实验》、《诺贝尔的决斗》、《真理的叛逆》（与威廉·J·布劳德合著）和《病入膏肓的世界》。他出生于英国，现居美国新泽西州。
