isbn:9780415374521

The 200 papers in this two-volume set are a selection of work by tunnel experts from Europe, Asia, and the USA, and also showcase the work of the host nation, Turkey. As the title implies, the scope of the book is enormous, covering every aspect of tunnelling from contract management to safety. The book is of special interest to researchers, scientists, engineers, project managers and manufacturers in the areas of tunnelling, underground structures, geotechnics, and geology as well as those involved in analysis and remedy of the safety aspects of tunnels. Includes a CD-ROM of the proceedings.
