著者:Lyons, Louis (EDT)/ Unel, Muge Karagoz (EDT)

出版者:Imperial College Press

出版时间:2006-5-17

装帧:Hardcover

isbn:9781860946493

These proceedings comprise current statistical issues in analyzing data in particle physics, astrophysics and cosmology, as discussed at the PHYSTAT05 conference in Oxford. This is a continuation of the popular "PHYSTAT" series; previous meetings were held at CERN (2000), Fermilab (2000), Durham (2002) and Stanford (2003). In-depth discussions on topical issues are presented by leading statisticians and research workers in their relevant fields. Included are invited reviews and contributed research papers presenting the latest, state-of-the-art techniques.
