著者:Wm. David Webster

出版者:The University of North Carolina Press

出版时间:2004-5-24

装帧:Paperback

isbn:9780807855423

The only volume to deal specifically with the mid-Atlantic region, this practical guide describes in detail the 88 terrestrial mammals found there as well as the 33 marine species that inhabit the offshore waters. The authors offer expert descriptions of each species, including feeding habits, activity cycles, reproductive biology, and relation to other animals and humans. By emphasizing the relationships between mammals and their environments, the authors reveal how these animals live throughout the year. They guide readers to an appreciation of mammalian life and a keen awareness of the importance of conservation and habitat preservation.

作者介绍:

WM. David Webster is professor of biology and curator of mammals at the University of North Carolina at Wilmington.

James F. Parnell lives in Wilmington and is coauthor of Birds of the Carolinas.

Walter C. Biggs Jr. is coauthor, with Parnell, of State Parks of North Carolina.
