This popular textbook describes the methods available to predict the occurrence of diffusion in alloys subjected to various processes. Major topic areas covered include diffusion equations, atomic theory of diffusivity paths, and thermo- and electro-transport. An updated and revised version of the original, this is an excellent textbook for metallurgical and materials science and engineering education.

评论

Shewmon的这本也读过了...因为这本书实在是过于陈旧，虽然包含了所需的内容，但在运算和数据上却有代沟。相比较阅读的流畅度和解说的清晰度，还是较新的那本更让人感到亲切。对于diffsionskoeffizient的种类和各自的计算，此中剖析具体的物义上，值得赞扬。
