isbn:9780942728187

FINGERPRINT SCIENCE presents a comprehensive, yet easily understood approach to material dealing with all aspects of fingerprint classification, identification, and filing systems. It is an excellent resource for student exposure to this very complex technology and can be used in both college and academy courses. Written for the beginning classifier, the material is versatile enough to be condensed for a supplemental reader and yet provides enough detail for semester-length presentations.
