著者:Summerlin, Lee R./ Borgford, Christie L./ Ealy, Julie B.

出版者:Oxford Univ Pr

出版时间:1988-5

装帧:Pap

isbn:9780841215351

Follows the philosophy and format of the first volume. Contains 112 demonstrations

appropriate for any introductory chemical program. Offers clear, concise text that details each demonstration. Explains how to do it, what the reactions are, and how to prepare materials and solutions. Provides a cross listing of demonstrations and chemical topics, thus allowing you to quickly find the right demonstration to fit a specific topic. Will benefit both student and teacher.
