装帧:Pap

isbn:9780132300971

For any introductory course in geography, history, political science, global studies, or multicultural studies that places an emphasis on maps. This versatile text and interactive workbook enables students to learn place geography - and, as they learn, to

reinforce and apply that knowledge by constructing thematic maps which convey physical, economic, cultural, or political characteristics of places. Building Geographic Literacy can be used with any current standard world atlas or geography textbook.
