This is a primer to the study of life and living organisms. Founded over 50-years ago, REA is dedicated to producing the finest and most effective digital and print materials in educational publishing. Each in-depth topic review is easy-to-follow and easy to grasp. Review questions after each topic highlight and reinforce key areas and concepts. It features student-friendly language for easy reading and comprehension. It includes quizzes that test your understanding. The "Biology Super Review" examines: the chemical and molecular basis of life; cellular organization; cellular metabolism and energy pathways; nutrition in plants and animals; the circulatory systems of animals; the nervous system; behaviour; reproduction; genetic inheritance; evolution; and ecology. You can take the "Super Review" quizzes to see how much you've learned - and where you need more study.
